Hi James,

I got notice today of a new job with the Corps in WV. I will know exacts tmrw, but I need to give you 30 days notice. Actually works great for you as the place will be available to you when you return on the 16th. Sat is the 15th and I'd probably move then.

Stand by, facts to come.

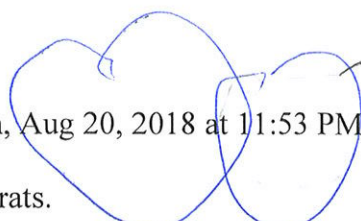

Travel safely.

Hey James. I am on the train. It's early, so excuse any typos.

I have re-read your email a couple of times and I am confused - you are coming back in a week or not til Dec? What happened to your court date that would have you back on 16 Sept.?

My plans to move have not changed, but as I wrote your Mother, I have no orders to date, so I am in a holding pattern. I can see this might drag on thru Oct to the latest, but not 100 % so I appreciate "no press ..". That noted I am so down about everything including this holding pattern. Sucks. You are lucky to have family. I do not. And jealous to a fault that you are where you are - this country is so f'ed up!! Can't wait to leave it forever!

I will probably keep paying rent to you and will let you know what's up the minute I know something. So when will you be back? I will place the ad as offered, just been slammed at work. I think you are asking too much considering upstairs just got rented to "Holly" an older woman. Anyway, no one has come by while I am there. Who are you expecting?

Peace,

Anna

I don't want you to upset my cats by dropping by for any reason. They are my family and I am their Stewart and it's not a joke. All of your things (except the couch which is covered and the king mattress) are packed away in the basement or at your parents, so you need no entry into the unit ibam renting. If you have someone interested, I will show it and I will need notice to tidy up. I need no additional stress in my life while you are in town. Please respect my privacy and the terms of the lease, that is all I ask. I don't want any problems. Thanks for respecting this email. No bad vibe intended, I just want peace and quiet in my life while in CT. Sure you do too. All units rented so I am sure your parents want no problems either. Thanks and safe travels back.

On Sun, Sep 16, 2018 at 12:20 AM James Larenaissance <jameslarenaissance@gmail.com> wrote:

this is not a sex disease

Hepatitis C virus (HCV) is a small (55–65 nm in size), enveloped, positive-sense single-stranded RNA virus of the family Flaviviridae. Hepatitis C virus is the cause of hepatitis C and some cancers such as liver cancer (hepatocellular carcinoma, abbreviated HCC) and lymphomas in humans.

Hepatitis C is an infectious disease caused by the hepatitis C virus (HCV) that primarily affects the liver.^[2] During the initial infection people often have mild or no symptoms.^[1] Occasionally a fever, dark urine, abdominal pain, and yellow tinged skin occurs.^[1] The virus persists in the liver in about 75% to 85% of those initially infected.^[1] Early on chronic infection typically has no symptoms.^[1] Over many years however, it often leads to liver disease and occasionally cirrhosis.^[1] In some cases, those with cirrhosis will develop complications such as liver failure, liver cancer, or dilated blood vessels in the esophagus and stomach.^[2]

I HAVE HAD NONE OF THIS!!!! NONE. EVER.

Hepatitis C virus is predominantly a blood-borne virus, with very low risk of sexual or vertical transmission.^[40] Because of this mode of spread the key groups at risk are injecting drug users (IDUs), recipients of blood products and sometimes patients on haemodialysis. Common setting for transmission of HCV is also intra-hospital (nosocomial) transmission, when practices of hygiene and sterilization are not correctly followed in the clinic.^[41] A number of cultural or ritual practices have been proposed as a potential historical mode of spread for hepatitis C virus, including circumcision, genital mutilation, ritual scarification, traditional tattooing and acupuncture.^[40] It has also been argued that given the extremely prolonged periods of persistence of HCV in humans, even very low and undetectable rates of mechanical transmission via biting insects may be sufficient to maintain endemic infection in the tropic, where people receive large number of insect bites.¹
